MOBI TUBE 1000

FXLIGHTING
FX-LIGHTING.COM

Please read carefully before use

Please Note: Specifications and improvements in the design of this unit and this manual are subject to change without any prior written notice.

Packaging: Thanks for your purchasing Mobi tube 1000. All the lights have been checked and are in excellent operating condition. Please check the shipping carton first, because there may be damage occurred during the shipment. Then check the lights carefully and be sure that the lights is intact and works normally. In the event damage has been found, spare parts are missing or the lights works abnormally, please contact us for further instructions. And please don't return the lights to the dealer before contacting us.

Introduction: Mobi tube 1000 is a mini wall washer with excellent performance. It is 200mm long, but its width of covering wall is 5m. 2.4G remote control is included. The house is made of extruded aluminum and die-cast aluminum cover. The ingress protection rating is IP65. However, there is no glue was used into the light. Mobi tube 1000 has won many certifications, including the CE, ROHS and so on.

SAFETY AND HANDLING

Before you operate this unit read the manual carefully. Always make sure to include the manual if you pass/rent/sell the unit to another user. Keep in mind that this manual cannot address all possible dangers and environments. Please use your own caution when operating. This product is for professional use only. It is not for household use.

- Do not operate the unit in areas of high temperature conditions. It will cause abnormal function or damage the product.
- Always use a suitable safety wire when mounting the light overhead.
- Connect the safety wire only to the intended safety mount.
- Always follow local safety requirements.

- Only qualified personnel may repair this product.
- Do not open the product housing.
- Do not apply power if the light is damaged.

- Do not directly look into the light.
- It can cause harm to your eyes.
- Do not look at the LEDs with a magnifying glass or any other optical instrument that may concentrate the light output.

- The exterior surfaces of the light can become hot, up to 70°C during normal operation.
- Ensure that accidental physical contact with the device is impossible.
- Install only in ventilated locations.
- Do not cover the light.

- LI-ION Battery: A rechargeable lithium ion battery is built into this unit.
- Only authorized personal may service the battery.
 - Do not place in fire or heat.
 - Do not use or charge the light if it is damaged.
 - Avoid bumping or plunging, it may cause fire or explosion.
 - Never store the battery when fully drained.
 - Always recharge immediately when empty.
 - Make sure to fully charge all units before storing them.
 - Partially charged batteries will lose capacity.
 - The battery may only be replaced with an original spare part.

- Always charge with the flight case open.
- It is recommended to charge at a temperature between 15°C and 35°C

- The light contains a lithium ion battery.
- Don't throw the unit into the garbage at the end of its lifetime.
- Make sure to dispose is according to your local ordinances and/or regulations, to avoid polluting the environment!
- The packaging is recyclable and can be disposed.

Troubleshooting

The fixture does not turn on.

The battery may be empty. Connect it to the power cable and try again.

The fixture turns on and the display is on, but the LEDs do not emit light.

The fixture could be set to BLACKOUT mode, set to is DMX Hold and doesn't receive a valid signal. It is good practice to do a Factory Reset.

The fixture is not working correctly - it does not display the color or effect chosen.

The fixture may still be operating under a previous setting. It is good practice to do a Factory Reset.

After completing a RESET SETTINGS, the fixture still cannot be controlled.

Please turn off the light and turn on again, if cannot be controlled, too, please consult authorized personal.

The fixture does not run long enough on battery.

The required RUNTIME can be set. It defaults to several hours. To achieve a greater battery runtime, set the RUNTIME to the required value.

Alternatively, program the fixture to only display colors that use less power, such as Red, Green, Blue and White.

If the runtime is still too short, consider that it is reduced slightly if the battery is very cold.

The power cable is connected but the fixture is not charging.

The battery may be fully charged. Please read our user manual for more details. The fixture will only commence charging when its battery has a temperature of 45° or less. Turn the fixture off and let it cool down; once cold enough, it will start charging. If it still not charging, please consult authorized personal.

4. During the flashing of the remote control light, the lamp flashes 3 times, which means that the connection is successful.

5. After the match is successful, when the remote control light is on, it means that the group of lamps is being controlled.

6. If there are multiple lamps that need to be connected, please repeat the above steps and press the  button to select different groups for connection. (Each group can connect up to 50 lamps.)

7. The furthest remote control distance of this product is about 50 meters. No need to rematch after power failure.

2.4G Remote

Power on/off button
Press and hold the power button for 3 seconds to turn on/off the remote control, short press the control light switch

DMX button,to control DMX address when press this button.It is SLAVE mode when double click.

The first one is Auto Mode.It is Speed mode when double click.

The first one is Sound Mode.It is Speed mode when double click.

Strobe mode button

Up and down button,you can choose the program that you need or numerical.

Switching group button
Press and hold the button for 5 seconds to enter matching mode

Group indicator light

Press color button enter color menu

Color choosing button.

You can use these number button to adjust numerical in any program mode.

How to connect 2.4G remote control

1. Press and hold the  button for 3 seconds to turn on or off the power of the remote control (the indicator light indicates that the remote control is turned on, and the remote control power will be automatically turned off after 1 minute of no operation).

!!The indicator light will automatically turn off after 1 minute of use and need to be pressed again for 3 seconds to turn on again.

Features

- LED Engine:80pcs*1W RGB+Mint+Amber colors
- Total LED Power 70 W
- Luminous Flux 3200K 2 600 Lumens
- Luminous Flux 4000K 2 800 Lumens
- Light Output 3200 K @ 1m 800 Lux
- Light Output 4000 K @ 1m 850 Lux
- CRI (Ra)/ TLCI 3200- 6500 K* ≥95
- Beam Angle 135° x 115°
- Field Angle 175° x 160°
- Strobe 0 - 25 Hz
- Pixels 16
- Battery Runtime up to 24 hours
- Battery Runtime Max Brightness 2.5 hours
- Battery Lifetime 70 % after 300 cycles
- Charging Time (nominal) 3 hours
- DC Input 24 VDC - 2 A
- DC Connector 5.5 mm x 2.1 mm
- Wired DMX Yes (via 4 pin M8 connector)
- CRMX Receiver Built-in
- 2.4G remote control (within 50m)
- Wireless Range CRMX up to 300 m
- Housing Material Polycarbonate, Aluminium and ABS materials
- IP Rating IP65
- Ambient Operating Temperature 0 - 40 °C / 32 - 104 °F
- Weight 1.35 kg
- Dimensions 1035 mm x 43 mm x 43 mm
- Mounting Options 2x M8 thread, 2x TubeHolder (with 2x M5 and 1x 1/4" - 20 UNC thread), 1x TubeStand

Product Overview

Tips & tricks

There are limitations to how wireless waves propagate through air. Physical barriers like glass, concrete and walls will limit the transmission range. Always try to have clear line-of-sight between transmitters and receivers.

Wireless indicator status	Description
Both blinking red color	wireless transmitter or receiver OFF or not linked with the projector
Both blinking but: Wireless green	Master and Slave with the projector not connect success
Both fixed green color	Master-Transmitter mode ON and linked with the projector Slave- Receiver

Connection in wireless mode -DMX

When connection wireless mode, please remember release first.

DMX led status and wireless indicator	Description
Both blinking red color	DMX not connected e wireless transmitter OFF or not linked with the projector
Both blinking but: DMX red - Wireless green	DMX not connected,transmitter ON and linked with the projector
Both fixed green color	Dmx connected,transmitter ON and linked with the projector

Programme Menu

CHARGE WITH ABS CASE

DURING THE COMPLETE PROCESS OF BATTERIES CHARGE THE UPPER COVER OF THE FLIGHTCASE MUST BE ALWAYS OPEN.

DURING THE COMPLETE PROCESS OF BATTERIES CHARGE THE PROJECTORS MUST BE ALWAYS OFF.

For correct use of the battery it is strongly recommended to:

- Charge the battery at least one time each month
- The minimum level of the charge must be not less than 5%

During the charge, the battery icon (visible on the display) will show the level of the charge. When the charge is finished, the icon will be totally green.

Connection in wireless mode - Master/Slave

When connection wireless mode, please remember release first.

Hanging, Stand

The Helios Tube can be hung via a bolt or clamp. When hanging, secure with safety wire and carabiner that hold at least 15kg. Make sure the light cannot drop more that 20cm if primary mounting fails.

Works with 1/4"-20 thread/

Displayer Introduction

1. When you enter DMX Mode,it will be showed DMX,when you enter SLAVE Mode,it will be showed SLAVE.
2. This shows the condition of signal transmission. Green is connected.Red is disconnected.
3. This shows the temperature of the lights.
4. This shows the menus you can select.
5. This shows the condition of wireless signal. Green is connected.Red is disconnected.
6. This shows the battery's electric quantity.

While DMX and Wireless signal are green,it means DMX Mode and Wireless are connected.

While DMX shows red but Wireless signal shows green,it means DMX Mode is disconnected and Wireless is connected.

While DMX shows green but Wireless signal shows red,it means DMX Mode is connected and Wireless is disconnected.

While DMX and Wireless are show red,it means DMX Mode and Wireless are disconnected.

While the letters and number shows change from white to yellow,it means the temperature beyond max temperature of default settings.

While the letters and number shows Error,it means have some problems of temperature.

While the battey is charging,it will showed running from empty to full.While you stop charging,it will showed how much the electric quantity.
